ATTENTION OF:
Art Unit 2612
EXAMINER:
NGUYEN, Nam V.

Dear Examiner Nguyen:

This Supplemental Information Disclosure Statement (“IDS”) is submitted pursuant to 37 CFR § 1.56. The filing of this “information disclosure statement shall not be construed to be an admission that the information cited in the statement is, or is considered to be, material to patentability as defined in § 1.56(b).” See 37 C.F.R. § 1.97(h).

Pursuant to MPEP § 2001.06(b), Applicant respectfully requests the Examiner confirm that all references cited in the pending application’s parent applications—i.e., U.S. Patent Nos. 6,977,576; 6,359,547; and 5,617,082—from which priority has been properly claimed there from, have been considered during prosecution of this application.

Applicant desires that this previously considered information be printed on the cover of any patent that may issue from the present application and therefore submits this information pursuant to 37 C.F.R. §§ 1.97 and 1.98. As such, to ensure that all references cited in the parent application(s) appear on the cover of a patent that may issue from the present application, Applicant has included the following references in PTO Form SB08 per MPEP §§ 609.02 and 609.06, which have been cited in the pending application’s parent application(s):

**BASIS FOR
RELEVANCE**

PURPOSE: To make it possible to permit or refuse the implementation of processing of entering and leaving a building, etc., by using an IC card for a manager of the building, etc., to unlock at the start or lock at the end.
CONSTITUTION: A CPU 31 controlling the entire of an IC gate device 3, a memory 32, a card-reader writer 33, an opening and shutting state detector 34, a timer 35 and an electronic lock driving section 36 are arranged. In addition, a communication interface 37 and a chime driving section 38 are provided. After that, when a manager

PURPOSE: To provide the building control system which performs entry and exiting control over a building and immediately recognizes the presence places of individuals in the building.

CONSTITUTION: An ID code sent as an electromagnetic wave from an ID card 1 is received by an antenna 21. The received ID code is collated by a discriminating circuit 24 with registered ID codes. When the received ID code is already registered, the electronic lock of a door is unlocked to allow the person to enter the room. At the same time, the presence place and movement history of the person who carries the card are controlled on the basis of the received ID code.

If any charges or fees must be paid in connection with the following communication, they may be paid out of our Deposit Account No. 50-0545.

Respectfully submitted,
